GERBER 5000 WASHERS

The Garver test bottle washer is extremely lightweight, compact, and is unlike other washers in that it doesn't require a permanent connection. The unit is designed to sit in the sink basin during washes, and then stored conveniently in a cupboard out of the way when not in use. The Garver test bottle washer quickly pays for itself by reducing operator labor, preventing test tube breakage, and test tube inventory. The washer features acid resistant aluminum base and top, and, durable nickel plated water manifold and spray stems. Rubber cushions at the base of the spray stems prevent glassware breakage. An electric air pump blows the water out of the small bulb on Gerber bottles. The unit will wash and rinse 11, 23, or 35 bottles in as little as 4 minutes.

5000 Series Specifications

Model #	5011	5023	5035
Type	Gerber Washer	Gerber Washer	Gerber Washer
Base & Cover Material	Acid Resistant Aluminum	Acid Resistant Aluminum	Acid Resistant Aluminum
